See what Fountain AI is all about

Increased applicant volume

Fountain AI instantly engages with applicants via an embedded widget on your career site. This allows recruiters to concentrate on conversations with the most qualified applicants, **saving time and effort for both recruiters and candidates.**

INSIGHT

By embedding the widget onto your website, applicants can easily start and resume an application from anywhere (e.g., start on the web, continue on a mobile phone with SMS or WhatsApp). The widget requires no complex code to implement and will be branded with your company’s name and brandmark.

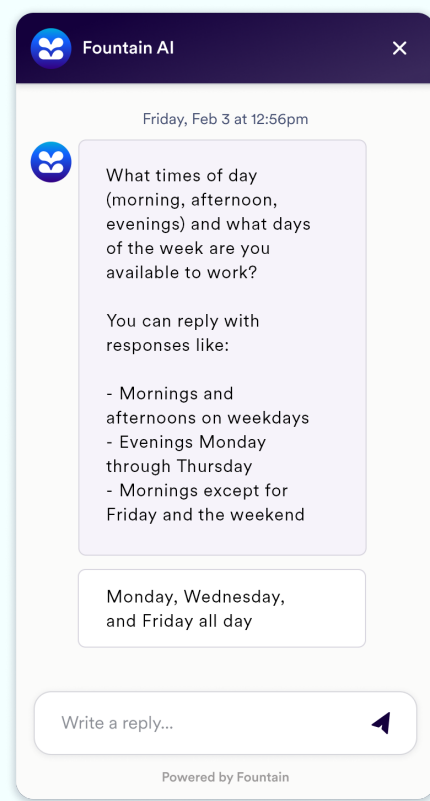

Smarter conversations

Focus on the highest value human efforts by letting Fountain AI collect important applicant information so you can **keep candidates engaged and moving through your hiring process** around the clock.

INSIGHT

Data collection information is automatically gathered by Fountain AI and populated directly into the Applicant’s Profile, offering an alternative to traditional form fields.

Automated interview scheduling

Let Fountain AI schedule interviews with the **right applicants** so you can wake up to a pipeline full of qualified candidates ready to meet with you. **Fountain AI can schedule onboarding meetings, too!**

INSIGHT

Fountain AI helps applicants stay engaged with more candidates and ensures they reach the end of the application.

Human-centric automation

If an applicant needs to speak to a recruiter or requires human assistance, **Fountain AI can easily connect applicants to you.**

INSIGHT

Recruiter browser notifications can be configured on your Profile Settings screen, and all Fountain AI communication is visible in the Applicant’s Profile and Messenger Screen within Fountain.
